

- side of membrane
- tube morphogenesis
- positive regulation of cell migration
- cell activation
- receptor complex
- regulation of leukocyte activation
- vascular process in circulatory system
- positive regulation of response to external stimulus
- import into cell
- wound healing
- cellular response to cytokine stimulus
- growth factor binding
- cellular response to steroid hormone stimulus
- multicellular organismal-level homeostasis
- negative regulation of immune system process
- gliogenesis
- DNA-binding transcription factor binding
- transepithelial transport
- negative regulation of cell differentiation
- regulation of leukocyte differentiation
